

# NURSERY NEST GUIDELINES

The Nursery Nest is for children under age 4. Older siblings are not allowed in the nursery. Please ask them to wait for you outside.

If your child has any of the conditions listed below, please **DO NOT** leave him/her in our nursery. (In that case, we invite you to make use of the Annex, a room off the kitchen with a window to the sanctuary where you and your child can sit during the service and hear all that's going on.)

- **FEVER** (100° plus) within the last 24 hours
- **DIARRHEA** within the last 24 hours
- **VOMITING** more than twice in the last 24 hours
- **ANY CONTAGIOUS SKIN DISEASE** (impetigo, scabies, ringworm) until treated with prescription medication for at least 48 hours
- **CONJUNCTIVITIS** (Pink Eye)
- **WHOOPING COUGH** until treated with antibiotics for at least 5 days
- **FLU, BRONCHITIS, or PERSISTENT COUGH**
- **EXCESSIVE RUNNY NOSE & WATERY EYES** that need continuous wiping
- **HEAD LICE**
- **STREP THROAT** until treated with antibiotics for at least 24 hours
- **ANY SYMPTOMS OF MEASLES, MUMPS, or CHICKENPOX**
- **ANY UNDIAGNOSED or UNTREATED RASH**

In addition, if your child is going through a **BITING** phase, we ask that you use good judgment about whether that behavior is likely to be a danger to other children. Human bites are very dangerous.

**EVERYONE** (adults AND children) WHO ENTERS THE NURSERY MUST USE THE HAND SANITIZER BEFORE GOING PAST THE RAMP DOOR.
